

eMix

Cement Truck Rotation Monitoring Solution

eMix is designed for monitoring cement trucks.

eMix enables the remote monitoring of the rotation and the direction of a cement truck mixer drum.

eMix uses dedicated sensors to count and report each drum rotation and its direction.

When Using the **eMix**, along with a **StarLink** telematics device, it is possible to know where, when and how much cement is being unloaded. ●

FEATURES

- 1 Drum rotation direction monitoring
- 2 Drum rotations count
- 3 Operating power: 12/24v
